AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. **(Currently Amended)** A computer implemented method for managing submittal requirements for a construction project, said method comprising the steps of:
 - providing a first database containing information related to managing a construction project having stored therein a plurality of requirements for the construction project including a set of required specifications for materials necessary to meet design parameters for the construction project;
 - providing a second database containing specific information on system users;
 - providing a third database containing information on submittal documents to be completed and approved as part of a project, said submittal documents including a set of actual material specifications to meet said set of required specifications;
 - providing a computer network including a plurality of user computer access points, said network including a subscriber access point for use by a subscriber to said system, said subscriber access point having full access to enter, to read and to change information in said first, second and third databases, wherein said subscriber changes information in said first database by providing at least said set of required specifications,
 - said network further including a contributor access point for use by a contributor to said submittal documents, said contributor access point having access to

Serial No. 10/693,590
Amendment Dated February 2, 2006
Reply to Notice of Allowance of January 20, 2006

read information in said first and second databases and access to enter,
read and change information in said third database to provide said set of
actual material specifications to meet said set of required specifications,
said network further including a responder access point for use by a responder,
said responder access point having access to read information in said first,
second and third database and having the ability to approve said submittal
documents;
posting a completed submittal, including said set of actual material specifications, to said
network for review by said responder following completion by said contributor;
approving said completed submittal electronically by said responder via said network;
and
archiving completed submittal documents ~~by said subscription service provider~~ for
future retrieval.

2. **(Original)** The method of claim 1 wherein said subscriber access point can issue
passwords to give access to information to said contributor access point and said responder
access point.

3. **(Previously Presented)** A computer network implemented method providing for
managing preparation of submittal documentation for a construction project said method
comprising the steps of:

providing a first database for receiving and storing information related to preparing a
submittal document for a construction project, receiving therein requirements for

Serial No. 10/693,590
Amendment Dated February 2, 2006
Reply to Notice of Allowance of January 20, 2006

the construction project submittal including a set of required specifications for materials necessary to meet design parameters for the construction project;

providing a second database for storing information about system users;

providing a third database for storing, retrieving and displaying submittal documents to be completed and approved as part of the construction project, said submittal document including a set of actual material specifications to meet said set of required specifications;

providing for a computer network including a plurality of user computer accessible points for accessing said first, second and third databases, wherein said databases are controlled by a subscription service provider;

receiving information via said computer network from a subscriber access point having full access to read and to change information in said first, second and third databases, wherein said subscriber access point provides information to change information in said first database by providing at least said set of required specifications;

receiving information via said computer network from a contributor access point having access to read only information in said first and second databases and access to read and change information in said third database to provide said set of actual material specifications to meet said set of required specifications; and

archiving completed submittal documents by said subscription service provider for future retrieval.

Serial No. 10/693,590
Amendment Dated February 2, 2006
Reply to Notice of Allowance of January 20, 2006

4. **(Previously Presented)** The method of claim 3 including the step of receiving information from a responder access point having the ability to read only information in said first, second and third database and said network having the ability to receive approval of said submittal documents from said responder access point such that automatic authorization of project payments can be provided via said computer network.
5. **(Original)** The method of claim 3 wherein a user of said subscriber access point is a prime contractor on said construction project.
6. **(Original)** The method of claim 4 wherein said requirements for the construction project include project drawings.
7. **(Previously Presented)** The method of claim 4 wherein a user of said responder access point is an architect or a project engineer on said construction project.
8. **(Original)** The method of claim 4 wherein said project payments are for materials required in said submittal document.
9. **(Previously Presented)** The method of claim 4 further comprising the step of automatically sending a message via said computer network to said contributor when information is received.
10. **(Canceled)**.
11. **(Previously Presented)** A computer network system comprising:

Serial No. 10/693,590
Amendment Dated February 2, 2006
Reply to Notice of Allowance of January 20, 2006

a first database for receiving information related to a submittal document for a construction project, receiving therein a plurality of requirements for the construction project submittal including a set of required specifications for materials necessary to meet design parameters for the construction project;

a second database for system users that receives a plurality of specific information about system users;

a third database for submittal documents to be completed and approved as part of the construction project, said submittal document including a set of actual material specifications to meet said set of required specifications;

a computer network including a plurality of user computer accessible points for accessing said first, second and third databases, wherein said databases are controlled by a subscription service provider;

a subscriber access point having full access to read and to change information in said first, second and third databases, wherein said subscriber access point changes information in said first database by providing at least said set of required specifications;

and a contributor access point having access to read only information in said first and second databases and access to read and change information in said third database such that said contributor can complete said submittal document by providing said set of actual material specifications to meet said set of required specifications and submit said submittal document via said computer network for approval; and

Serial No. 10/693,590
Amendment Dated February 2, 2006
Reply to Notice of Allowance of January 20, 2006

archiving completed submittal documents by said subscription service provider for future retrieval.

12. **(Original)** The computer network system of claim 11, wherein a user of said subscriber access point is a prime contractor on said construction project.

13. **(Previously Presented)** The computer network system of claim 11, including a responder access point having the ability to read only information in said first, second and third database and said network having the ability to receive approval of said submittal documents from said responder access point such that automatic authorization of project payments can be provided via said computer network.

14. **(Previously Presented)** A computer network implemented method providing for managing preparation and storage of submittal documentation for a construction project said method comprising the steps of:

providing a first database for receiving and storing information related to preparing a submittal document for a construction project, receiving therein requirements for the construction project submittal including a set of required specifications for materials necessary to meet design parameters for the construction project;

providing a second database for storing information about system users;

providing a third database for storing, retrieving and displaying submittal documents to be completed and approved as part of the construction project, said submittal document including a set of actual material specifications to meet said set of required specifications;

providing for a computer network including a plurality of user computer accessible points
for accessing said first, second and third databases, wherein said databases are
controlled by a subscription service provider;
receiving information from at least one subscriber access point having full access to read
and to change information in said first, second and third databases, wherein said
information changes information in said first database by providing at least said
set of required specifications;
receiving information from at least one contributor access point having access to
complete said submittal documents by providing said set of actual material
specifications to meet said set of required specifications; and
archiving completed submittal documents by said subscription service provider for future
retrieval.

15. **(Original)** The method of claim 14 including the step of notifying automatically said
subscriber and said contributor access points upon approval of a submittal document through
said computer network.

16. **(Original)** The method of claim 14 wherein said at least one contributor access point has
access to read and change information in said first and second databases.

17. **(Previously Presented)** The method of claim 14 further comprising the step of receiving
approval of said submittal documents such that automatic authorization of project payments can
be provided via said computer network.

18. **(Original)** The method of claim 17 wherein payment requests are received from said contributor.
19. **(Original)** The method of claim 1 wherein automatic authorization of payment can be provided via said network.
20. **(Original)** The method of claim 1 wherein said network comprises the Internet.
21. **(Original)** The method of claim 3 wherein a user of said contributor access point is a subcontractor on said construction project.
22. **(Original)** The method of claim 3 wherein said computer network comprises the Internet.
23. **(Canceled)**.
24. **(Original)** The method of claim 11 wherein said computer network comprises the Internet.
25. **(Original)** The method of claim 14 wherein said computer network comprises the Internet.
26. **(Canceled)**.
27. **(Canceled)**.
28. **(Canceled)**.
29. **(Canceled)**.
